DETAILED ACTION

This office action is in response to the amendment filed on 8/3/04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Frost et al. (US Patent 5,776,417).

Regarding claims 2, 4, Frost discloses an exhaust emission control device of an internal combustion engine, comprising:

an underfloor catalyst wherein a CO oxidation catalyst and a water trap are coated on a support (see col. 2, lines 53-60, col. 3, lines 14-19); and

a HC trap disposed upstream of the water trap (see Figure 1, see col. 7, lines 9-10, 24-25).

Regarding claim 3, Frost further discloses the water trap being disposed upstream of the CO oxidation catalyst (see col. 2, lines 21-30).

Regarding claims 5, 6, Frost further discloses that the water trap and CO oxidation catalyst are disposed as layers or mixed to each other (see col. 3, lines 14-22).

Application/Control Number: 09/974,878

Art Unit: 3748

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over by Frost et al. (US Patent 5,776,417) in view of Mizuno et al. (US Patent 6,029,441).

Regarding claim 12, Frost discloses an exhaust emission control device of an internal combustion engine, comprising:

an underfloor catalyst wherein a low temperature light-off CO oxidation catalyst and a water trap are coated on a support (see col. 3, lines 14-19);

a secondary air supply unit disposed upstream of the underfloor catalyst (see Figure 9); however, fails to disclose a HC trap disposed upstream of the secondary air supply unit. Mizuno teaches that it is conventional in the art, to utilize a HC trap disposed upstream of the secondary air supply unit (see Figure 2; see col. 8, lines 51-63).

It would have been obvious to one having ordinary skill in the art at the time the invention was made, to have utilized said HC trap disposed upstream of the secondary air supply unit as taught by Mizuno in the Frost device since such would have increased the efficiency of the emission control system.

Art Unit: 3748

Allowable Subject Matter

Claims 1, 7-11 allowed.

Response to Arguments

Applicant's arguments filed 8/3/04 have been fully considered but they are not deemed-persuasive.

In the amendment filed on 8/3/04, the Applicant argued that the Frost reference fails to disclose that the HC trap is disposed upstream of an H₂O trap and a CO oxidation catalyst and the H₂O trap are coated on a support. The Examiner respectfully disagrees, the Frost reference discloses that a second water trap is positioned downstream of the catalyst i.e. downstream of the HC trap (see col. 7, lines 9-10, 24-25) and a CO oxidation catalyst and the H₂O trap are coated on a support (see col. 2, lines 53-60, col. 3, lines 14-21).

Art Unit: 3748

Conclusion

Any inquiry concerning this communication from the examiner should be directed to Examiner Diem Tran whose telephone number is (703) 308-6073. The examiner can normally be reached on Monday -Friday from 8:30 a.m. - 5:00p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion, can be reached on (703) 308-2623. The fax number for this group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0861.
